

**We formulated, in our laboratories,  
a unique herbal complex to zone in on...  
...Supporting appetite by delaying cravings and  
increasing fat-cell activity!**

**Experience a powerful new citrus herbal complex called Body Trim™!**

Lipolysis...deals with the way your body metabolizes the foods you eat, and the way your body pulls from fat reserves.

Recent research at McGill University in Canada shows that certain ingredients in Body Trim™ may stimulate Beta-3 adrenergic receptors that may actually help break down fat during lipolysis.

Therefore, you can actually burn fat and receive a smooth flow of energy without bothering other receptors such as Beta-1, Beta-2, or Alpha-1 that can cause a jittery feeling and an overly stimulated effect.

Body Trim™ ingredients include some very unique components that can help release nutrients related to metabolism and, as a result, more efficiently burn fat. These same ingredients may even help support glycogen processing in the digestive system.\*

The ingredients in Body Trim™ include a wide array of herbs including citrus aurantium, karaya, eleutherococcus, ganoderma lucidum, astragalus, nevadensis, paullinia cupana, salix alba, fucus vesiculosus, centella asiatica, rehmannia glutinosa, and zingiber officinale.

As with any dietary supplement, if you are on any type of medication or if you are pregnant or lactating, consult your primary care physician before using Body Trim™.

\*Body Trim™ is not intended to diagnose, treat or cure any disease.
